EDUCATION

DHEMAJI ENGINEERING COLLEGE — Assam, India
B.Tech in Computer Science and Engineering — *2022-2026*
CGPA: 7.81

GYAN BIKAS ACADEMY — Assam, India
CLASS 12: 73.1 — *2019-2021*

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks,

EXPERIENCE

@OpenPrinting / Open-Source Contributor | *Git, Linux, C* — *February, 2026*

- Contributed to the **cpdb-backend-cups** repository, the core backend for the CUPS common printing dialog.
- Enhanced the **Open Printing official** website by implementing new features and solving issues.
- Key contributions include **Pull Requests –** #46 **,** #44 , #228 and #233

Hackathon — ResumeAI | *React, Node.js, Express.js, NLP, Hugging Face models* — *August,2026*

- Built an AI-powered resume analysis platform that evaluates resumes against job descriptions.
- Implemented ATS scoring, readiness scoring, cosine-similarity matching, skill-gap detection, and recruiter-style feedback.
- Integrated Hugging Face inference APIs and resume parsing for automated candidate analysis.

Numaligarh Refinery Limited / Software Developer Intern | C# , SQL server — June 30th-July 30th *2025*

- Developed a **SRS document** for the **S.A.T.U.R.N** feedback system.
- Integrated with the **Asset Management & Call Logging system**.

PROJECTS

ResumeAI | *Live Link* | *Github* | *React, Node.js, Express.js, Hugging Face, Tailwind CSS* — 2026

- Developed an **AI-powered** resume analysis platform that **automates summarization** and **evaluates** job-role compatibility**.**
- Implemented features including **automated skill extraction, cosine similarity, ATS compatibility scoring, readiness assessment, missing-skill gap analysis, and actionable feedback generation**.
- Deployed the full-stack application on **Vercel**(frontend) and **Railway**(backend), utilizing e**nvironment variables** for secure api configuration.

Master Worker Architecture for LSTM , CNN AND RNN | *Python , Pandas, Numpys* | *Research Based* — 2026

- Built a master-worker architecture to train **LSTM , CNN and RNN** models.
- Utilized a **HAR dataset** to train the models and compared them to identify the best-performing model.
- Applied optimization techniques such as **Grey Wolf Optimization** , **Whale Optimization Algorithm** and **RMS prop** etc.
- Model performance was evaluated using metrics including **Accuracy, F1-score , Recall** and **Precision** etc.

Blogify — Full-Stack Blogging Platform | *github* | *React, Node.js, Express.js, MongoDB, JWT* — 2026

- Developed a full-stack blogging platform with a**uthentication, CRUD workflows**, and responsive UI.
- Implemented JWT authentication, protected routes, API integration etc.
- I used React for the frontend along with shadcn/ui and AceternityUI for the interface.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C, C++, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, Chakra UI, AceternityUI, Tanstack Query, Zustand

Backend: Node.js, Express.js, REST APIs, JWT, Axios

Databases: MongoDB, PostgreSQL, SQL

Tools & Platforms: Git, GitHub, Docker, Docker Compose, Postman, Linux, Vercel, Railway

ACHIEVEMENTS

Winter Of Code 5.0 | @OpenPrinting Organization under the Linux foundation

Participated in numerous hackathon including OpenAI x NamasteDev , SIEC etc
